E VET respirOforte

Erisöödad

Ergänzungsfuttermittel für Pferde

But what about the horses suffering from chronic obstructive bronchitis (COB), horses with recurrences, in which this has been exasperated due to false nutrition or care etc.? Is it possible to positively influence the bronchial musculature, to influence their contractions or cramps based on modifying feeding and using specific plants? These questions were the prime focus during the development of respirOforte. To be able to break the vicious circle of slime formation, diminishing ciliated epithelium and a continuous constriction of the bronchi at any point, without additionally burdening the organism, would be a true success.
The MSM (methylsulphonylmethane) contained in respirOforte makes the cell membranes more permeable so that important active ingredients and nutrients can be better absorbed.
In addition, this organically bound sulphur compound is known for its positive influence on the muscular tissue. The contained lungwort can help in the long-term expansion of the bronchi. Watercress has a high content of methylcysteine and ensures better secretolysis. Specially combined herbs in turn promote the coughing up of stubborn mucus.
In order to ensure the full progression and influence of the product, continuous use of respirOforte is recommended, especially for chronic or recurrent respiratory problems.
Due to its abortive effect, respirOforte must not be used on pregnant mares!
Likewise the use of this product if competing within 48 hours is forbidden (FN waiting time 48h).

The benefits at a glance:

- for horses with chronic or recurrent respiratory problems
- Lungwort supports the expansion of the bronchi
- MSM ensures better absorption of important nutrients and active ingredients, as well as relaxation of the (bronchial) musculature
- Watercress (methylcysteine) ensures secretolysis
- special herbs help to clear the mucus
- recommended for permanent feeding

Toitmissoovitused:

Feeding recommendation:

ponies & small horses: 15 g (1 level measuring spoon) per day
large horses 600 kg: 20 g (1 heaped measuring spoon) per day

Feeding duration: at least 3 weeks
Recommended continuously for chronic feeding problems.
Do not use with pregnant mares.
This product may not be used during competitions! (FN/FEI). (FN waiting time 48 h)

Koostis: MSM (metüülsulfonüülmetaan), Lungwort, piparmünt, leedripuu, salvei, islandi samblik, tüümian, vägihein / aniis, Nõgeselehed, fenkol, Hibisk, leedripuu, paiseleht, kummel, Vägiheinalilled, Marigold flowers, raudrohuekstrakt, Lagrits, põldosi

seeduvat proteiini (vRp): 38,5 g/kg
seeduvat energiat (MJ DE): 9,5 MJ DE/kg
Metabolizable energy (MJ ME): 8,5 MJ ME/kg

Analüütiline koostis: 6,20 % Toorproteiin, 1,50 % Toorõlid ja -rasvad, 19,20 % Toorkiud, 4,90 % Toortuhk, 0,50 % Kaltsium, 0,20 % Fosfor, 0,05 % Naatrium

Lisandid kg kohta: 1.465 mg Propionsäure aus Calciumpropionat (1a282) [TA]

NA = Toitumuslikud lisandid
ZA = Zootehnilised lisandid
TA = tehnoloogilised lisandid
SA = Sensory additives
